Hopefully you did not write too many multiplication facts above. Your job is to learn the ones you don't know over the Christmas break, and for this you're going to need get a bit creative.

1. You could sing them to your family at breakfast time. 
2. You could write them on sticky notes and stick them all around your house. 
3. You could even change the name of each member of your family. Gran could now be called '6 times 7 is 42'. 

Remember that practice makes...?

...no not Christmas pudding!

Not to be completed until just before you return to school in January.
